

Grade 3 Basic Facts Math Blasters Program

Dear Grade 3 Families,

The mastery of basic addition and subtraction math facts is essential in providing students with the skills and confidence they need to build on higher level mathematical concepts.

We will be beginning our basic facts math blasters program this week. Students will work through one set of basic addition and subtraction math facts each week, starting with the 0 facts, then the 1 facts, then the 2 facts, and so on, up to the 10 facts. Students will have their own sets of flashcards for daily practice at school and at home each week. Please help your child practice their basic facts flashcards for about 10 minutes every night. Just a little bit of nightly practice makes a big difference! Additional resources and games for basic math fact practice can also be found on our class website. Thank you in advance for your support and commitment to your child's learning!
